Dear Mr. Jorgensen:

RE: Cancellation of the Notice of Intent for a 109 MW Cogeneration Plant.  
Project Number: NSR014080-0001

On August 31, 2007, we received a Notice of Intent (NOI) from your firm to construct and operate a 109 MW cogeneration plant to be located at 400 South 1100 West in West Bountiful, Utah. Shortly thereafter as per instructions from your consultant the Division placed the review process on hold due to the high level of public sentiment opposed to the construction. The letter included in Dave Kopta's email request mentioned that Consolidated Energy is in the process of reviewing the design of the plant and its pollution control systems. Any such redesign would require the submission of an entirely new NOI as the previous submission would be invalid. To date we have received no further information regarding such a new submission, nor any request to resume processing on the original submittal.

This letter formally cancels the project started in August 2007. Consolidated Energy may of course re-submit the request at any time in the future. Consolidated Energy will receive a bill for DAQ staff time spent working on the project to date. Please call John D. Jenks of my staff with any questions or concerns you may have. John can be reached at (801) 536-4459.

Sincerely,

Ty L. Howard  
Manager, New Source Review
